

MEASURING YOUR PIANO .

A total of five dimensions are required in order for us to provide a quote for the production of a piano cover.

Here's how:

1. Measure the total height at the back of the piano (measure A= cm.)
2. Measure the total depth of the piano (measure B= cm.) from the back to the edge of the keyboard.
3. Measure the height in the front (dimension C= cm.) from the floor to above the keyboard.
4. Measure the depth at the top (dimension D= cm.)
5. Measure the total length (dimension E= cm.)
6. When measuring A and C, subtract off a few centimeters so that the cover doesn't hit the floor. It's up to your discretion.

ATTENTION: Please e-mail the measurements to us at info@knuddanielsen.dk together with your choice of material and color.
